NAIROBI CBD CAMPUS

IBM DIGITAL NATION AFRICA(D-NA)

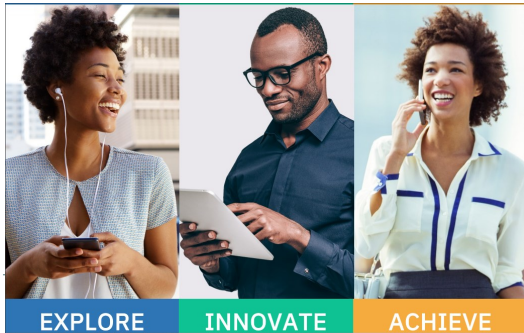

The Digital – Nation Africa (D – NA) aims to empower Africans in digital literacy for free. Our curriculum is designed for the following three types of audience:

Explorers—People with basic digital literacy that are keen on learning about the new emerging technologies.

Innovators—Designed to help accelerate innovation and enable ‘would be’ innovators to bring their ideas to life

New Collars—For those that want to align their skills to the requirements of the job market and seek better employment opportunities

MOBILE APPLICATION DEVELOPER

Interesting Highlights

Did you know that a mobile app could solve a city's traffic, water, and health problems? Not just that, an app can educate children with disabilities, change a diabetic's life, and even help eradicate cancer.

Setting Trends in Higher Education ,Research and innovation

Career Pathways and opportunities

The Mobile Application Developer will learn to develop, test, debug and deploy hybrid mobile applications. This will require skills in application development frameworks such as Sencha Touch, jQuery, Dojo and Apache Cordoba. The Mobile Application developer will use tools to create and publish mobile applications in public marketplaces such as Android SDK and Xcode, and also in private enterprise mobile application markets such as IBM MobileFirst.

Course Summary

The Mobile Application Developer roadmap includes the following courses and exams/badges. The curriculum runs for 4 weeks after which you can sit the IBM certification exam.

Module I—Mobile Computing Overview

Module II—Mobile Application Foundation

Module III—Mobile Application Developer

IBM Official Badges: Mobile Application Developer:

Explorer | Mastery Award

Associated Job Roles :

Mobile Application Developer

Cloud Application Developer

Business Process Developer
