Everything you know already is outdated.

Everything you are yet to know is probably also outdated

You need to find out more and by the time you know it, it is probably also outdated.

My Research Experience @ JICA Special Seminar jkuat.ac.ke 7

Do not commit to a research because you need a PhD, an MSc or a Research Grant

You should go into research to fix a problem like Elon Musk, Bill Gate etc.

**Purpose of Research**

Multiply the Usefulness of your research by the number of people it impact, that should guide whether it should be committed to or not

**Impact Factor=Usefulness \* Number of impacted population**

**Research Interest**

Conceptual of Science

Mathematics Modeling for Dancing

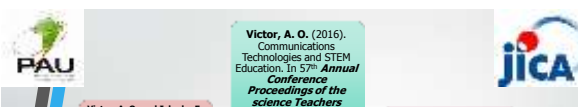

Numerical Weather Prediction

Financial Inclusion

Economic Development & Growth

Disease Control

**Challenge 6: Staying Motivated and Working Your Plan**

Follow your passion and your purpose.  
Monitor your attitude.

Reward yourself.  
Ask for help.

**Challenge 7: Dealing With Your Data**

Ground yourself in the research.  
Get back to your methodology.

Listen to the data.  
Take advantage of technology.

Stay Focused and Account for Biases  
Let the data drive your presentation.
